Harikrupa, Mogar, Anand 388340

github.com/HarpalsinhSolanki

12+ years building Android apps — from solo-owned products at small studios to leading a team shipping apps across retail, travel, and logistics. These days I'm most comfortable on the frontend JS side and working with SQL-heavy backends, having also picked up React Native, PHP/Symfony, and hands-on use of Claude AI along the way.

01 EXPERIENCE

Senior Software Engineer

AUG 2021 — PRESENT

Helios Solutions • Vadodara

Works across client communication, task analysis, QA, and end-to-end development. Expanded from mobile into frontend web, redesigning an interactive 3D product customization tool (Fabric.js for 2D design editing, Three.js for real-time 3D preview) for a USA-based drinkware/tumbler e-commerce brand from a conversion perspective. Also spent the past year as a back-office developer modernizing a Norway-based platform's legacy PHP/Symfony stack, leaning on Claude AI to accelerate the migration.

Software Engineer

MAR 2019 — AUG 2021

Voolsy Networks Pvt Ltd • Ahmedabad

Built and maintained a suite of hospitality and enterprise products: a restaurant management app for dine-in, take-away and payments; a companion kitchen display system; a white-labelled digital signage platform; an event/registration check-in app; and a self-service employee meal coupon system. Delivered a fingerprint-based 1:1 identity verification system for a school client.

Android Developer → Team Lead

APR 2014 — MAR 2019

Fusion Informatics Ltd • Ahmedabad

Grew from Android Developer into Team Lead, driving development, design and cross-functional collaboration. Shipped Android apps across franchise & retail, travel & tourism, workforce management, petroleum fleet & logistics, and aviation e-learning. Continuously evaluated new technologies to maximise development efficiency.

Lecturer

NOV 2012 — OCT 2014

Anand Institute of Information Science • Anand

Taught and managed teaching plans, giving students practical grounding in C, C++, Oracle, Java, and Android.

02 SKILLS

LANGUAGES

Java

Kotlin

Dart

TypeScript

JavaScript

PHP

FRAMEWORKS & PLATFORMS

Android

React Native

Fabric.js

APIs

03 EDUCATION

Master of Computer Applications (MCA)

Anand Institute of Information Science · July 2012
8.05 CGPA — Gujarat Technological University

Bachelor of Computer Applications (BCA)

M. B. Patel Science College · April 2012
First Class — Sardar Patel University

04 FEATURED PROJECTS

3D Product Customization Tool — USA Drinkware Brand

Led a business-driven redesign of an interactive product customization tool, rebuilding the experience with Fabric.js for 2D design editing and Three.js for real-time 3D preview — a personal shift from mobile into frontend web technology.

JavaScript

Fabric.js

Three.js

Frontend

PHP & Symfony Version Upgrade — Norway-based Platform

Back-office developer modernizing legacy PHP and Symfony versions, leaning on Claude AI to accelerate migration work.

Backend

Claude AI

React Estate Property Search

Cross-platform app (Android + iPhone) to buy and sell property across domestic, abroad, and commercial categories, with location-based saved searches and new-listing alerts — where hands-on iOS development entered the mix.

React Native

TypeScript

iOS

APIs

Find Perfect Roommate

Connects tenants, landlords and roommates around shared rooms and apartments based on interests and needs.

Android

Kotlin

Firebase

Digital Signage — Voolsy Screen

Cloud-based, white-labelled signage platform — the company's flagship product — managing video, image, gif, animation and HTML across Android devices and smart TVs in four orientations, with usage monitoring and background/foreground downloads.

Android

Java

Cloud

Voolsy Manager & KDS

Restaurant management app for dine-in, take-away and payments, paired with a companion kitchen display system giving live, categorized order visibility and timers.

Android

Java

Payments

05 OTHER NOTABLE BUILDS

GVoolsy — biometric self-service meal coupon system

1:1 Biometric Verification — school ID matching system

Dubai Travel & Tourism — itinerary and booking app

Aviation E-Learning — video courses and progress tracking

Scan Covid Certificate — vendor QR verification app

VooNote — event check-in / registration capture app

Franchise Retail Management — multi-outlet operations app

UAE Currency Exchange — live rate exchange app

BPCL FleetGenie — petroleum fleet & sales ops apps

Kalorex & Digital Best Deal — education & e-commerce apps

Open to new opportunities and collaborations.
